Silicon Labs (NASDAQ: SLAB) is the leading innovator in low-power wireless connectivity, building embedded technology that connects devices and improves lives. Merging cutting-edge technology into the world's most highly integrated SoCs, Silicon Labs provides device makers with the solutions, support, and ecosystems needed to create advanced edge connectivity applications. Headquartered in Austin, Texas, Silicon Labs has operations in over 16 countries and is the trusted partner for innovative solutions in the smart home, industrial IoT, and smart cities markets.

GigaDevice

GigaDevice Semiconductor Inc. (SSE Code: 603986) is a world-leading fabless supplier founded in April 2005 and headquartered in Beijing, China. GigaDevice is creating a chip ecosystem fusing computing, storage, and sensing, embracing the smart networked chip age. GigaDevice's core product lines are Flash memory, 32-bit general-purpose MCU, smart human-machine interaction sensors, analog products and solutions. GigaDevice's industry-proven products are renowned for high performance and low power consumption.

Quantum® is Efinix's key technology: an FPGA fabric arranged in a simple block-based format with interspersed columns of RAM and multipliers or DSP blocks. This fabric is designed to be process and fab agnostic, as well as compatible with a true SoC design flow. This scalable platform targets markets from intelligent edge devices to industrial automation to vision systems to edge servers and communications. The first-generation Trion® FPGAs are based on the patent-protected Quantum® architecture. This family gives customers access to this key new FPGA fabric, enabling edge applications or high-volume applications such as mobile and IoT that need devices that are optimized for small packages, low power, and volume.

NETSOL is a fabless IC design and marketing company established in 2010. They are leading the world in the next generation memory solutions, particularly in STT-MRAM. Their headquarters is in Gyeonggi-do, Korea. Armed with strong development capabilities, they provide customized/optimized memory solutions to a wide range of applications. Leveraging the expertise in designing low cost, small size, and low power consumption memory solutions, their products are widely applied in industrial automation, network system, medical, gaming, enterprise data centre and IoT devices.
